Professional Summary

Technical Writer with a 15-year enterprise IT foundation specializing in software documentation, knowledge management, and process architecture. I am expert at bridging documentation gaps, collaborating cross-functionally, and transforming complex legacy data into structured information ecosystems at a 60,000+ device scale.

Areas of Expertise

- **Technical Writing:** SOP Development, Knowledge Base (KB) Architecture, Release Notes, Markdown, API/Software Documentation, Document Design.
 - **Process & Information Architecture:** Gap Analysis, Content Migration, Process Mapping, Content Strategy, Taxonomy & Structural Frameworks.
 - **Enterprise Technical Domain:** Digital Signage Ecosystems, MDM & RMM Dashboards, Systems Troubleshooting, Network Security.
-

Professional Experience

Spectrio | Remote

Technical Writer / Subject Matter Expert (Technical Support Specialist II) | June 2022 – Present

Documentation Ecosystem Architecture: Partnered with management on the end-to-end restructuring of the internal corporate Knowledge Base, transforming legacy technical data into a structured, searchable ecosystem across 6 enterprise platforms and 60,000+ devices.

Operational Process Mapping: Co-authored and integrated a "Support Ticket Life Cycle" matrix that mapped active troubleshooting phases to standardized triage workflows; reduced agent search time and improved Tier 1/Tier 2 escalation accuracy.

SOP Framework Development: Took ownership of the standardization of technical frameworks for new Standard Operating Procedures (SOPs) across core enterprise platforms (Enplug, DSX, GRRID), delivering polished documentation that streamlined cross-departmental operations.

Project Documentation Lead (National Initiative): Selected as one of two primary specialists to stabilize a high-stakes nationwide KIA dealership pilot. I identified critical documentation gaps, authored the entire framework of technical SOPs, escalation paths, and training materials, establishing the model adopted as the new national support standard.

Enterprise Environmental Systems Expertise: Maintained technical oversight of system health for a 60,000+ device digital signage network using InReality MDM and RMM dashboards, utilizing this deep domain expertise to ensure all written technical workflows matched real-world system behaviors and maximized uptime.

Technical Projects

Developer Portfolio & Documentation Site | [maswildlabs.com]

Information Architecture & Migration: Engineered a professional portfolio site utilizing the Astro framework, successfully migrating, restructuring, and formatting legacy developer documentation originally managed in MkDocs.

Content Authoring & Management: Author and maintain comprehensive technical project summaries, configuration guides, and architectural overviews utilizing Markdown syntax and version control practices.

Education & Certifications

University of Kansas - Salina | Online

Technical Writing Specialized Training | Expected Completion: 2026

Distinction: Document Design Capstone portfolio selected by the instructor to serve as the exemplary model for future curriculum students.

Technical Writer HQ | Online

Certified Technical Writer | 2026

Fresno City College | Fresno, CA

Certificate of Achievement, Cybersecurity | 2021 – 2022

Heald College | Fresno, CA

Associate of Applied Science, Network Security and Administration

Honors Graduate; Student Mentor of the Information Technology Program.
